High Speed Sliding & Swing Gate Operators

- Proven Reliability
- 98+% Duty Cycle*
- Easy-to-use Advanced Electronics
- Class Leading Security Features

*Power Pack Motors

Designed for residential sliding gates, up to 300 kg

Drive 300

FEATURES:

- **Cost Effective** residential sliding gate automation
- **Tough DC Motor** with removable brushes for easy maintenance
- **LED Display** for easy programming and diagnostics

Security:

- Gate and beam tamper alarm monitoring
- Electronic locking of motor unit with remote control for added security
- ET-Blu Mix® enhanced rolling code receiver on board

Designed for high-traffic sliding gates, up to 1000 kg

Drive 1000

FEATURES:

- **Heavy duty robust design** for high-traffic industrial sliding gate automation
- **Proven Power Pack** operation with true battery backup
- High speed motor with intelligent control
- **Advanced Electronics** with large back-lit display for easy programming, diagnostics and fault reporting
- Designed to house up to two 24V 3.5Ah batteries for extra internal battery backup

Security:

- Gate and beam tamper alarm monitoring
- Optional heavy duty security bracket
- ET-Blu Mix® enhanced rolling code receiver on board.

Designed to automate residential swing gates, with gate leaves of up to 3.5m each

WINGO

FEATURES:

- **Hi-Speed** operator for swing gate leaves up to 3.5m
- **Robust** cast aluminium design with powder coating
- **Low noise** operation
- **Proven power pack** operation with true battery backup
- **LED** display for easy programming and diagnostics
- Magnetic encoder ensures reliable and precise obstacle detection
- ET-Blu Mix® enhanced rolling code receiver on-board

Designed to automate residential and industrial swing gates, with gate leaves of up to 5m each

TOONA 5

FEATURES:

- **Powerful operator** for swing gate leaves up to 5m
- **Robust** cast aluminium design with powder coating
- **Proven power pack** operation with true battery backup
- **LED** display for easy programming and diagnostics
- Magnetic encoder ensures reliable and precise obstacle detection
- Easy installation, operation and maintenance
- ET-Blu Mix® enhanced rolling code receiver on-board

Designed for residential sliding gates, up to 500 kg

Drive 500

FEATURES:

- **Proven** robust and reliable residential slide gate automation
- **High Speed Motor** with removable brushes
- **Advanced Electronics** with large back-lit display for easy programming, diagnostics and fault reporting

Security:

- Gate and beam tamper alarm monitoring
- Pin code lockable programming
- Optional heavy duty security bracket
- ET Blu Mix® enhanced rolling code receiver on board

SPEEDO

FEATURES:

- **Heavy Duty** design for industrial Sliding Gate automation
- Soft start/stop facility
- **LED** array and display for indication of gate motor status
- General purpose relay
- **Battery back-up**
- Loop detector facility
- Programmable
- Optional plug-in receiver
- ET-Blu Mix® enhanced rolling code SMXI receiver- uncrackable, unhackable
- Easy Installation

Designed for high-traffic sliding gates, up to 500 kg

Drive 600

FEATURES:

- **Proven Power Pack** for high traffic applications with true battery backup
- **High speed motor** with removable brushes
- **Advanced Electronics** with large back-lit display for easy programming, diagnostics and fault reporting

Security:

- Gate and safety beam tamper alarm monitoring
- Pin code lockable programming
- Optional heavy duty security bracket
- ET-Blu Mix® enhanced rolling-code receiver on board

ELITE

FEATURES:

- **Powerful operator** for swing gates up to 5m
- **Soft start/stop** facility
- **LED** array and display for indication of gate motor status
- General purpose relay
- **Battery back-up**
- Loop detector facility
- A.S.A.P mode ensures fast gate auto-close
- Optional plug-in receiver
- ET-Blu Mix® enhanced rolling code SMXI receiver- uncrackable, unhackable
- Lip function

South Africa's Favourite Garage Door Operators

- Proven Reliability
- Robust Construction
- Intelligent Design
- Safe Operation
- Easy to install

FEATURES:

- **Robust** construction with metal chasis and gears
- **Reliable** and proven DC Blue Advanced technology
- **Intelligent** door load profiling for added safety and control
- **Simple** to program and fault find with 7 segment LED display
- Sleek, modern design
- Safety beam input
- Selectable automatic closing time
- LED courtesy light and optional external light control
- Optional electronic lock control for added security
- Built-in ET-Blu Mix® enhanced rolling code receiver - Uncrackable and Unhackable

Designed for residential sectional overhead and trackless tip-up garage doors of up to 10m²

DC Blue
ADVANCED
PICO

Designed for residential sectional overhead and trackless tip-up garage doors of up to 15m²

DC Blue
ADVANCED

FEATURES:

- **Cost effective** roll-up garage door automation
- **Not battery dependent**, 60w power-supply driven
- **Simple** two button setup without limit switches
- **Security:**
 - Door and safety beam tamper alarm
 - Positive close mode
 - Electric lock control
 - Built-in ET-Blu Mix® enhanced rolling code receiver
- **Intelligent** safety beam input and load profiled obstruction sensing
- **Convenient** 400 lumen high bright led light

Designed to automate residential roll-up garage doors of up to 8m²

DC Blue
ADVANCED
ROLL-UP
MOTORHEAD

Designed to automate residential roll-up garage doors of up to 8m²

DC Blue
ADVANCED
ROLL-UP
CONTROL BOX

FEATURES:

- **Robust construction** and reliable operation for demanding applications
- **Easy to install**
- Fits onto shaft directly
- **Narrow profile** - for limited space installations
- Magnetic encoder - no need to adjust limit switches
- **Safe** operation with obstacle detection
- **Precision** movement with adjustable speed and slow-down options
- ET-Blu Mix® enhanced rolling code SMX1 receiver- uncrackable, unhackable

Designed for commercial and industrial sectional overhead garage doors of up to 20m²

SOON

Designed for commercial and industrial sectional overhead garage doors of up to 35m²

SUMO

FEATURES:

- **Strong** motor and gearbox construction
- **Easy to install**
- Fits directly onto shaft
- **Narrow profile** - for limited space installations
- Magnetic encoder - no need to adjust limit switches
- **Safe** operation with obstacle detection
- **Precision** movement with adjustable speed
- Service warning light for door maintenance
- Integrated battery charger
- Optional integration with ET-Blu Mix® Transmitters and Receivers

Longest Range Transmitters, Receivers & Keypads

- Class Leading Range
- Propriety Double Encryption ET-Blu Mix Rolling Code
- Uncrackable / Unhackable
- Robust and Reliable

434 MHz ET-Blu® Mix Rolling Code Transmitters

Class-leading 400m transmission range

404 MHz ET-Blu® Mix Rolling Code Transmitters

Class-leading 400m transmission range

434 MHz ET-Blu Mix® Rolling Code Receivers

404 MHz ET-Blu Mix® Rolling Code Receivers

TX2-MICRO

FEATURES:

- A cost effective wireless solution for cable replacement
- Class leading transmission range of up to 1000m*
- Compact design. 40mm x 34mm x 19mm
- Examples of uses are: Electric fence alarm output linked to the house alarm, house alarm PGM outputs linked to the garage door motor, gate motor or switching lights on and off

* Radio transmission ranges quoted, are based on clear line of sight usage in a radio clutter free environment.

RX2-MICRO

FEATURES:

- A cost effective receiver solution
- Compact design. 40mm x 34mm x 19mm
- Simple and easy to setup
- Examples of uses are: switching alarm functions such as arm/disarm, panic activation, triggering garage door, barrier and gate operators

ET-Blu Mix® Rolling Code Outdoor Products

ET HPTX 3 RC
3 Channel, high powered, enhanced rolling code weatherproof transmitter

ET RXTX RC
High powered, enhanced rolling code weatherproof repeater

ET ERX 1 RC
1 Channel, enhanced rolling code weatherproof transmitter

E-Pad 02 - Wireless Access Control Keypad

FEATURES:

- Compact, stylish design
- Weatherproof
- Rugged
- Vandal resistant
- 250m transmission range
- ET-Blu Mix® enhanced rolling code - Uncrackable / Unhackable

E-Pad - Access Control Keypad

FEATURES:

- Weatherproof, stainless steel housing (IP65)
- 99 User selectable 4 to 8 digit operating codes
- Vandal resistant
- Keypad deactivation after multiple incorrect code entries (Anti-hacking)
- Anti-tamper switch (Standard)
